PROFESSIONAL SUMMARY

Workflow Automation Specialist and Technical Business Analyst with over 10 years of experience in technical operations and application support, telephony systems, and low-code development. Skilled in translating complex business processes into intuitive, user-centered solutions using AppSheet, Apps Script, and Power Platform tools. Combines technical expertise with design thinking to improve usability, streamline workflows, and drive data-informed decision-making.

CORE SKILLS

Business & Analysis:

Requirements Gathering | Process Mapping & Optimization | Stakeholder Coordination | Technical Documentation

UI/UX Design:

User Research | Journey Mapping | Storyboarding | Wireframing | Prototyping | Usability Testing

Automation & Development:

Google AppSheet | Google Apps Script | Google Sheets | Power Apps | Power Automate | SharePoint

Web & Programming:

HTML | CSS | JavaScript | jQuery | Bootstrap | PHP | Java | SQL

Tools:

Figma | Adobe XD | Whimsical | Looker Studio | Google Workspace | Microsoft 365 | Adobe Creative Suite

SELECTED PROJECTS

Contract Lifecycle Management System

- Led end-to-end UI/UX design and development of user-facing low-code applications using Google AppSheet and Google Apps Script. Also developed a version using Power Platform tools (Power Apps, Power Automate), and SharePoint.
- Created user flows and implemented automated email notifications.
- Built an interactive Google Looker Studio dashboard to visualize contract data and improve tracking efficiency.
- Replaced manual data filtering in Google Sheets with real-time reporting and insights.
- Reduced contract processing time by ~40% and improved data visibility for stakeholders.

Timesheet-Tracking System

- Designed and implemented a digital timesheet system to streamline time logging and approvals.
- Created intuitive input forms and user flows to improve data accuracy and ease of use.
- Automated submission reminders, approvals, and reporting workflows.
- Improved submission compliance rate and reduced manual consolidation time by ~30%.

Asset / Inventory Management System

- Designed user-friendly interfaces for efficient asset monitoring and tracking.
 - Automated alerts for asset status and lifecycle events.
 - Reduced manual tracking effort by ~50% and improved asset accountability across teams.
 - Reduced data entry errors and accidental record changes by implementing validation rules and access controls.
-

WORK EXPERIENCE

UBX — Digital Workplace Officer

Nov 2024 - Mar 2026 | Ortigas, Pasig

- Designed and developed user-facing low-code applications using Google AppSheet, Google Apps Script, Google Looker Studio, Power Platform tools (Power Apps, Power Automate), and SharePoint.
- Automated internal workflows with real-time notifications and approval systems.
- Conducted user training and provided technical support to enhance tool adoption.
- Implemented access control and governance practices to ensure data security and compliance.
- Built systems for timesheet tracking, contract lifecycle management and asset/inventory management.

INDRA SISTEMAS — Service Delivery Lead

Jul 2016 - Aug 2024 | Ortigas, Pasig

- Led cross-functional teams to improve service workflow predictability and delivery consistency.
- Managed and monitored telephony operations for enterprise systems.
- Drove continuous improvement initiatives to optimize resource allocation and reduce operational costs.
- Collaborated with stakeholders and cross-functional teams to enhance service processes and performance.

VTECHNOLOGIST PTE. LTD. — Field Application Engineer

Nov 2013 - May 2016 | Singapore

- Provided end-to-end technical support for third-party applications, including installation, configuration, and integration.
- Troubleshoot complex system issues through log analysis and root cause investigation.
- Acted as a liaison between clients and vendors for issue resolution and technical coordination.
- Delivered user training, onboarding, and technical documentation.

DTSI Group — Field Application Engineer

Jul 2008 - Sep 2013 | Makati Avenue, Makati City

- Supported deployment and integration of enterprise applications across client environments.
 - Performed system troubleshooting, performance monitoring, and issue resolution.
 - Assisted in solution validation, proof of concept (POC), and technical demonstrations.
 - Contributed to pre-sales and post-sales technical support activities.
-

EDUCATION

Professional Certificate in UI / UX Design Essentials
